

Installing ART 10812

Step	Description	Screenshot
1	Reset the camera To Reset the camera keep the Reset button pushed about 5 seconds. The camera will need about a minute to restart	
2	Connect the smartphone with the camera Connect the smartphone with the hotspot of the camera.	

2B	Possible that your phone/tablet shows now a pop-up messages that the 'router' (your camera) doesn't have any Internet connection	This NO problem because you don't need the Internet to have connection between your phone/tablet and the camera. Just ignore the pop-up and close it.	
3	UCCAM	Open the app uccam and click "add camera" Choose the green magnifying glass The camera will be found click on it	

4	UCCAM Password	Now you have to give the camera a new password In this example I simply used 12345678	
5	UCCAM camer name	Next step: Choose a name for the camera and confirm by clicking "Sure"	

6	UCCAM List of cameras	The connected camera will be shown in the camera list now	
7	Connected	By selecting the camera the picture should be shown now
